

Come Visit Us at IBS – Booth #W4379

What do Peyton Manning and Barbara Corcoran have in common? They're both coming to Orlando in January as keynote speakers at The [NAHB International Builders' Show!](#)

"When it comes to residential construction, this show is like the Olympics," says Risa Edelstein. "From product suppliers and education sessions to networking opportunities and special events, it's everyone and everything you want or need in one place. We always love networking with new and existing clients, but this year, we're particularly excited about the education series."

While the show itself is January 10-12 at the Orange County Convention Center, pre-show courses start on January 7. In fact, there are more than 130 education sessions in 8 industry tracks held during show week. Topics include 55+ Housing, Green Building, Modular building, High Performance Building and Remodeling.

We've already covered some of these topics on our TAPED blog. If you haven't visited in a while, check out some of our top residential construction posts:
